PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience designing and developing scalable backend systems using C#, .NET, ASP.NET Core, REST APIs, SQL Server, and Redis. Built and maintained 20+ production APIs serving 2,000+ users, with demonstrated impact in API performance, database optimization, caching, authorization, and production reliability. Experienced in owning features end-to-end from design and development through deployment and production support.

TECHNICAL SKILLS

Backend: C++, C#, .NET Core, ASP.NET Core, Web API, RESTful API Design

Frontend: Angular, Razor, JavaScript, HTML5, CSS3, jQuery, AJAX

Databases Caching: MS SQL Server, Redis

Tools: Git, GitHub

Coursework: Data Structures, OOPs, SOLID Principles, JWT Authentication, System Design Fundamentals

WORK EXPERIENCE

Software Engineer

July 2024 - Present

Newgen Software Technologies Limited

- Designed and shipped 20+ production-grade ASP.NET Core REST APIs serving 2,000+ concurrent users at 99.9% uptime, applying SOLID principles and Clean Architecture for long-term maintainability.
- Introduced a Redis caching layer across high-traffic endpoints, cutting redundant database reads and improving average API response time.
- Built reusable, testable backend services and shared libraries adopted across multiple product features, reducing duplicate implementation effort across teams.
- Owned features end-to-end from design through deployment and production support, partnering with frontend, QA, and DevOps.

Software Engineer Trainee

January 2024 – June 2024

Newgen Software Technologies Limited

- Designed and developed modular backend components integrated into the core product architecture.
- Optimized complex SQL queries and indexing, reducing API response time by 40% and database load by 30%.
- Implemented role-based authorization and secure API access controls for 2,000+ internal users.
- Diagnosed and resolved critical production defects, reducing the defect rate by 30% and improving system stability.

PROJECTS

Omnirecruit

C#, ASP.NET Core, Angular, Web API, SQL Server, Redis, JWT

- Designed and built the end-to-end hiring workflow engine (test → scoring → interview → final selection) powering the recruitment pipeline.
- Integrated HirePro's assessment APIs to automate candidate test retrieval, score calculation, and real-time status synchronization for thousands of applicants.
- Automated 70–80% of manual recruiting tasks, improving pipeline visibility and accelerating decision-making.

Performance Management System

ASP.NET Core, C#, Angular, SQL Server, Redis

- Built a role-based goal-management platform supporting 1,000+ employees across the organization.
- Designed and shipped 20+ REST APIs powering workflows, dashboards, approvals, and reporting.
- Implemented dynamic workflow state transitions with server-side validation and configurable business rules.
- Reduced page load time from 6s to 2s through query optimization and Redis caching.

EDUCATION

KIET Group of Institutions

Bachelor of Technology [CSE] 8.00 CGPA

July 2024

Ghaziabad, Uttar Pradesh
